

Our simple & cost effective order fulfilment service has been specifically designed with small businesses in mind.

How It Started...

2001

We opened our first storage container facility in Lancing, West Sussex.

2011

We then opened a second facility in Hastings, East Sussex.

2018

We began seeing demand from our commercial customers who wanted us to send out orders for them & so we branched out into order fulfilment.

Storage Containers

...the smarter way to store your products

- Cost-effective alternative to traditional warehouses.
- Having a dedicated storage container means your stock is kept entirely separate from other customers' stock.
- Stock is housed together and not in different parts of a warehouse so there is no chance of items going missing.
- Picking, packing and labelling is carried out inside the container improving efficiency.
- Enhanced security features compared to a building.
- No fire risk as they are made of metal.
- Specifically designed to withstand extreme weather conditions so dampness is not an issue.

How It Works...

Arrange for your stock to be delivered to our premises. On arrival, we will transfer it to your dedicated storage container, checking for any damage as we go.

Your account manager will input each item of stock into our inventory management software.

Your stock is housed in your own storage container. All storage space is clean, dry and secure. Stock is regularly inspected by us.

Parcels will be delivered by either your preferred courier or one best matched to your requirements selected by us. Orders received before 2pm will be dispatched on the same day.

We will pick your orders & affix delivery labels ready to send out to your customers.

We can now begin to receive orders from you as and when customers place them on your website or marketplace.

How We Handle Orders...

We have a streamlined process ideally suited to small businesses.

Your customer places an order on your website or marketplace.

You generate the sales order.

Either manually email the sales order details to us or we can integrate our inventory management software with your website or marketplace so orders can be received by us automatically.

The order is picked, packed and labelled ready for courier collection.

You will receive email confirmation when the order is dispatched to your customer.

What It Costs...

There are two elements to our pricing – a monthly storage charge for holding your stock and a handling charge for each item shipped.

Storage Charges

We have two sizes of storage container available:

- 20ft container – usable volume: 22m^3 (776ft^3) – **£155pm**
- 10ft container – usable volume: 11m^3 (388ft^3) – **£77.50pm**

This equates to 20p per cubic foot per month.

All prices are subject to VAT at 20%.

Handling Charges

We charge **65p** per item to cover the cost of picking, packing and labelling.

You can calculate the amount of storage space you need by multiplying the box dimensions (length x width x height) by the number of boxes to be stored.

Storage Charge Example 1

Box dimensions: 55cm(L) x 34cm(W) x 29cm(H)

Amount to be stored: 1000 boxes

Total storage space required: 54.23m³

Containers required: 2 x 20ft containers (44m³)
and 1 x 10ft container (11m³)

Monthly cost: **£387.50 + VAT**

Storage Charge Example 2

Box dimensions: 32cm(L) x 21cm(W) x 19cm(H)

Amount to be stored: 100 boxes

Total storage space required: 1.28m³

Containers required: 1 x 10ft container (11m³)

Monthly cost: **£77.50 + VAT**
